

ProControl

Series Choke Control

FEATURES:

- Weather resistant design
- Steel-body construction
- Several knob options
- Metric or SAE body

BENEFITS:

- Positive detent in off position
- Proven reliability

Product Description

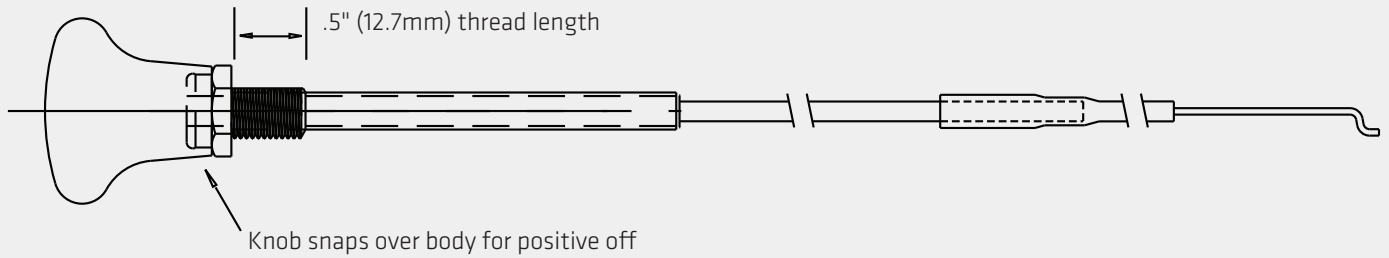

Kongsberg Automotive presents its ProControl Series Choke Control, developed to meet the demands of the commercial power equipment environment. The robust steel-bodied Choke Control can be mounted in metal or plastic panels. Its “snap action” feature creates a positive detent that synchronizes the choke in the “off” position during assembly, helping to seal out dirt and moisture, and eliminating inadvertent movement due to vibration.

The ProControl Choke Control meets a range of temperature and routing conditions, with a working load capacity of up to 35 lbs./155N. The choke symbol can be raised or hot stamped to satisfy aesthetic preferences.

As a leading developer and manufacturer of mechanical control cable assemblies focused on the unique needs of power equipment OEMs, Kongsberg Automotive is committed to responding to its customers with innovative solutions, proven technical excellence and world class production capabilities.
