

Diversity Policy

At Kongsberg Automotive, we believe that business performance and productivity are enhanced by a diverse workforce; therefore we are committed to promoting a culture where diversity is represented. We also believe that greater diversity will lead to higher performing teams, improved decision processes and increased global prosperity.

That's why we place respect for the individual as one of the cornerstones of all KA policies; we acknowledge and accept the differences between all individuals.

Our diversity policy covers characteristics including but not limited to gender, age, ethnicity, cultural background, disability, sexual preference and religion. With this policy, KA aims to have a diverse and representative workforce and management structure; where everyone is valued and respected for their skills, experiences and views.
