A PLACE IN HISTORY

THE STORY OF KONGSBERG AUTOMOTIVE IS OF ORDINARY PEOPLE CREATING AN EXTRAORDINARY COMPANY.

Its origins trace back to the historic Norwegian defense contractor Kongsberg Våpenfabrikk. The first commercial auto parts to be produced and delivered were brakes and drive shafts for Volvo in the late 1950s. Since then, Kongsberg Automotive has developed from a Scandinavian auto parts supplier to a global leader in one of the most competitive and complex industries in the world.

IMPORTANT

The consequence of using the wrong fluid on the hydraulic gear shifter is that both the o-ring and the lip-seal gets soft and swells. Below we have tested lip-seals belonging to GLA 626321AM that uses brake fluid and GLA 630388AM that uses mineral oil.

Please pay attention to the labelling that indicates type of fluid, both on the box and on the product.

The lip-seal made for brake fluid is exposed to mineral oil, Pentosin.

The seal gets soft and swells to nearly double size.

Important to use separate equipment for filling.

Recommended brake fluids: **DOT3, DOT4 & DOT5**

The lip-seal made for mineral oil is exposed to brake fluid, DOT4.

The seal gets soft and swells just a fraction, but enough to create leakage.

Important to use separate equipment for filling.

Recommended mineral oil: **Pentosin**
